

創新策略與實踐：農業服務團推動食農教育的新路徑

洪柏榕

八里榕爺黃金筍農場 場長

摘要

在現代社會中，隨著農業技術與教育的發展，我們不僅要關注農產品的產量，更應重視其品質與生態友善。黃金筍—綠竹筍在食農教育中的角色日益重要，如何有效推廣這項當季美味，成為了我們的核心課題。在推動食農教育的過程中，我們秉持著「生態永續」的理念，通過互聯網技術與創新的教育方式，打破農業與城市之間的隔閡。透過舉辦各類活動與講座，鼓勵消費者親身體驗農業生產過程，進而培養他們對農產品的認知與熱愛。現代農業已不再僅僅局限於生產，更需要著眼於循環經濟與生態平衡。我們致力於在農場內實施有機耕作與循環利用，實現資源的最大化使用，減少對環境的負面影響。這不僅僅是一種生產模式，更是一種生活態度。未來我們希望能夠持續推動食農教育，讓更多人了解並參與到這項意義深遠的事業。我們堅信，只有通過教育與實踐的結合，才能真正實現生態永續與食品安全的雙重目標。希望每一個消費者都能成為食農教育的一部分，共同守護我們的土地和健康。

關鍵字：食農教育、當季食材、有機農業、循環農業

Innovative Strategies and Practices: New Pathways in Food and Agricultural Education Promoted by Agricultural Service Groups

Bo-Run Hung

Farm Director, Bali Hung's Oldham Bambooshoot Farm

Abstract

In modern society, with advancements in agricultural technology and education, we should not only focus on the yield of agricultural products but also emphasize their quality and ecological friendliness. Golden bamboo shoots (green bamboo shoots) are increasingly important in Food and Agricultural Education, making it crucial to effectively promote this seasonal delicacy. In advancing Food and Agricultural Education, we adhere to the concept of "ecological sustainability," using internet technology and innovative educational methods to bridge the gap between agriculture and urban areas. By organizing various activities and lectures, we encourage consumers to personally experience the agricultural production process, thereby fostering their awareness and love for agricultural products. Modern agriculture is no longer limited to production alone; it must also focus on circular economy and ecological balance. We are committed to implementing organic farming and resource recycling on our farm to maximize resource use and minimize environmental impact. This approach is not just a production model but a lifestyle. We hope to continue advancing food and agricultural education to help more people understand and participate in this meaningful endeavor. We firmly believe that only through the combination of education and practice can we truly achieve the dual goals of ecological sustainability and food safety. We hope every consumer can become a part of food and agricultural education, jointly protecting our land and health.
